

## **Pre-Toddler Program (Two Year Olds)**

Our curriculum is designed to guide and develop the social, emotional, self-control, physical and neurological skills needed for future success. Although many academic concepts are introduced, the focus remains on each child's development and how they fit into their environment.

Communication skills are a vital component of the curriculum as children expand their vocabularies and assign meaning to new experiences. With our Spanish immersion approach, toddlers are rapidly learning a second language as quickly as their native language.

Exploring the world really inspires a child to examine, create, and share as he broadens his language through interactions with his teachers and classmates in a safe, nurturing environment. Sensory and repetitive activities transform these new experiences into knowledge.

Our program also incorporates circle time, music, art, and dramatic play to encourage and shape your child's creativity and imagination. Activities promote the development of physical skills, from running and jumping, to dressing and pre-writing.

In our community of exploration, your child can learn, grow, and celebrate the world around him/her.
